KANJI BARAIYA

+91 7859883156 | kanjib808@gmail.com | Gujarat, India

PROFESSIONAL SUMMARY

- BCA graduate and MSc IT postgraduate student with hands-on experience in Python (Django) and PHP web development.
- Experienced with Python, Django, PHP, MySQL, JavaScript and Bootstrap through academic projects and a professional internship.
- Strong foundation in database management, CRUD-based application development, role-based access systems and REST-style integrations.
- Interested in opportunities involving Python/Django development, full-stack development, and backend engineering.

TECHNICAL SKILLS

- **Programming Languages –** PHP, Python, JavaScript
- **Backend Development –** PHP, Django
- **Databases –** MySQL, SQLite, Firebase
- **AI Tools –** ChatGPT, Claude, Google AI Studio
- **Frontend Development –** HTML5, CSS3, JavaScript, Bootstrap
- **Development Tools –** Git, VS Code, Cloudinary
- **Concepts –** OOP, CRUD Operations, Role-Based Access, Admin Dashboards

General

- **Languages –** Gujarati (Native), English (Fluent), Hindi (Fluent)

EXPERIENCE

ITHub Software Company, Gujarat

PHP Intern *2025 (6 months)*

- Worked on website development and digital marketing tasks using PHP, MySQL, HTML5, CSS and Bootstrap.
- Contributed to live website features, gaining practical experience in server-side development and debugging.

EDUCATION

Maharaja Krishnakumarsinhji Bhavnagar University (MKBU), Gujarat

Master of Science (Information Technology) *2025 – Present*

Maharaja Krishnakumarsinhji Bhavnagar University (MKBU), Gujarat

Bachelor of Computer Applications (BCA) *2021 – 2024*

PROJECTS

Apna Nivas – Real Estate Platform

- Built a platform connecting buyers directly with property owners, with no broker involved.
- Implemented role-based buyer/seller accounts; sellers get a dashboard of sold and listed properties.
- Built an admin panel to approve properties before they go live; used Firebase for data and Cloudinary for media.
- Built using Google AI Studio, Firebase, Cloudinary and AI coding tools (ChatGPT, Claude).

Blog Website – CRUD Application

- Developed a blog platform using PHP and MySQL with a strong focus on CRUD operations.
- Implemented signup/login so only registered users can read or upload blogs.
- Built an admin view to manage (view, edit, delete) all submitted blogs.

Portfolio Website

- Developed a full-stack, responsive portfolio website using Python, Django and SQLite.
- Included a project showcase and contact system with database-backed message handling.
